DETAILED ACTION

Response to Amendment

1. Applicant's amendment submitted on July 14, 2004 has been received and carefully considered. Claims 23 and 24 are newly added. Claims 3-8 and 10-16 are cancelled. Claims 1, 2, 9 and 17-24 remain active.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 2, 9 and 17-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is unclear as to the structural limitation applicant is attempting to recite by, "releasing heat... to a heat-transfer medium in the tube packets, *to water/steam*," in lines 5-6, as it is unclear as to whether the heat-transfer medium comprises "water/steam", and whether "water/steam" indicates water *or* steam, or water *and* steam. Furthermore, "collector (9)" and "collector (10)" (lines 9, 10, 12, 22-27) lack proper positive antecedent basis. Also, it is unclear as to the relationship between "collector (9)" or "collector (10)" and the "ring pipe" set forth in line 7, since the specification and drawings disclose that each of "collector (9)" or "collector (10)" is comprised of the ring pipe, whereas the claims appear to recite three discrete elements for the ring pipe, collector (9) and collector (10). Furthermore, "tube *bundles* (2)" (lines 24, 26-27), "the collector wall" (lines 24 and 26) and "the midline of the collectors (9)" (lines 25-27) each lack proper positive antecedent basis. Also, it is unclear as to the relationship

Art Unit: 1764

between the plural “collectors (9)” and the singular “collector (9)” set forth in line 9. Also, it is unclear as to the axis which defines “the midline of the collectors” in lines 25-27 (i.e., a horizontal midline or vertical midline) as well as its relationship with the reactor wall located between the two halves of the collectors in lines 12-15.

Regarding claim 2, “collector (9)” and “collector (10)” (lines 9, 11, 21-24) lack proper positive antecedent basis. Also, it is unclear as to the relationship between “collector (9)” or “collector (10)” and the “ring pipe” set forth in line 6, since the specification and drawings disclose that each of “collector (9)” or “collector (10)” is comprised of the ring pipe, whereas the claims appear to recite three discrete elements for the ring pipe, collector (9) and collector (10). Furthermore, “gas” (line 9), “the collector wall” (lines 21, 23) and “the midline of the collectors (9)” (lines 22-24) each lack proper positive antecedent basis. Also, it is unclear as to the axis which defines “the midline of the collectors” in lines 22-24 (i.e., a horizontal midline or vertical midline) as well as its relationship with the reactor wall located between the two halves of the collectors set forth in lines 11-14. Furthermore, it is unclear as to which collector (9) or (10) is referred to by “the collector” in line 19.

Regarding claim 9, it is unclear as to the relationship between “the ring pipe [that] terminates in a collection of distribution chamber and is mounted on *an interior of the reactor wall*” in lines 9-10 and “the distribution or collection chamber... placed on the reactor wall *both inside and outside... assigned to the interior of the reactor wall... and... assigned to the exterior of the reactor wall,*” in lines 11-16.

Regarding claims 23 and 24, “tube *bundles* (2)” lack proper positive antecedent basis. Furthermore, it is unclear as to which collector (9) or (10) is referred to by “the collector” in line

Art Unit: 1764

1. Also, it is unclear as to the axis which defines "the midline of the collectors" (i.e., a horizontal midline or vertical midline) as well as its relationship with the reactor wall located between the two halves of the collectors as set forth in claims 1 and 2.

Allowable Subject Matter

3. Claims 1, 2, 9 and 17-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
